The Ultimate Driving Machine

UNIVERSAL DVD SYSTEM.

REAR-SEAT ENTERTAINMENT, FRONT-SEAT FOCUS.

Movies and more, on the move.

Driving pleasure is a given in all BMW cars. So is the pleasure of being driven. Which is why the Universal DVD player, purpose-built for BMW, is such good news. With this entertainment package, everyone on board gets to savour each journey to the full.

While, for instance, youngsters wearing headsets in the rear watch movies, listen to music or play games, the driver and front passenger remain free to relax and enjoy an uninterrupted drive. As the system is built specially for BMW, you are also guaranteed sleek style, uncompromised quality and, crucially, a secure fit. What's more, like all BMW cars, the player has been thoroughly crash-tested. The result is the safest DVD player of its kind, meeting stringent European standards.

The package comprises an infrared remote control, carrying bag, two portable 7-inch screens – one with an integrated DVD slot – and easy-to-install mountings fixed to the head-restraint spars. When you park, simply unclip the screens and take them with you. As well as being a security bonus, this means the player, with its portable power pack, can be enjoyed anywhere.

In the car, power comes from a neatly retractable cable that plugs into the 12-volt outlet or lighter socket. And high quality sound can be heard either through integrated speakers, wireless headphones or you can plug in your own. As for compatibility, the system is extremely flexible, playing back a wide range of formats through CDs, DVDs, USB devices and memory cards.

Universal DVD System

Key features / benefits

- Two 7" digital TFT screens (resolution 480x234)
- Easy-to-install headrest mounting system with 'Click & Play' technology
- Fully crash tested (meets European safety standards (ECE R-17 and ECE R-21))
- Infra-red remote control
- Includes 3-in-1 card slot for SD /MMC /MS /MS-Pro and USB host
- Supports S-video input /output, CVBS input /output, earphone
- 2 slim integrated stereo speakers (1W). Sound can also be relayed via infrared headphones (available separately) or through standard stereo headphones (available separately).
- Headphone socket of the DVD units allow connection via the vehicles AUX-IN socket (if equipped) by way of a 3.5mm cable (available separately) and then DVD sound can be played through the vehicles speakers
- Screens can be operated outside the car using a standard 12V power pack*
- Padded canvas carry bag for protected mobility.

Part Number: 65 12 2 160 229

**RRP: £299.00
(inc VAT at prevailing rate)**
